

FAHEEM

Product Designer

Bangalore, India | faheemseyadmd@gmail.com | +91 6379439162 | www.faheem.work

PROFESSIONAL SUMMARY

Product Designer with ~3 years of experience designing SaaS platforms, internal tools, and data-intensive dashboards. Specialized in simplifying complex workflows, structuring information-heavy interfaces, and improving usability across B2B products. Proven ability to drive measurable impact through engagement, conversion optimization, and scalable design systems.

CORE SKILLS

UX Design | Product Design | SaaS Product Design | Dashboard Design | UX Research | User Flows | Information Architecture | Wireframing | Prototyping | Design Systems | UI Components | Design Tokens | Usability Testing | Heuristic Evaluation | Accessibility (WCAG) | Component Library | Interaction Design | A/B Testing | Conversion Rate Optimization | Cross-functional Collaboration | Developer Handoff | HTML | CSS | ReactJS | Figma

PROFESSIONAL EXPERIENCE

UI/UX DESIGNER

Nov 2023 - Nov 2025

Pickcel, Bangalore, IN

- Led end-to-end design for CMS dashboards and website revamps, improving usability and accessibility across data-heavy interfaces.
- Increased platform engagement by **29.5% YoY** by optimizing workflows, improving information hierarchy, and reducing friction.
- Improved pricing page visits by **65.8%**, contributing to higher conversion and customer acquisition.
- Redesigned complex workflows, reducing cognitive load and enabling faster task completion for diverse user groups.
- Built and scaled a **design system (components + tokens)** improving consistency and accelerating design-to-development handoff.

UI/UX DESIGNER (Intern)

Mar 2023 – Nov 2023

Pickcel, Bangalore, IN

- Designed wireframes and high-fidelity prototypes for new features, improving usability and interaction clarity across the CMS platform.
- Collaborated with stakeholders and developers to iterate on features based on feedback and usability insights.

VISUAL DESIGNER

Apr 2022 – Present

Freelance

- Designed brand identities and scalable visual systems, contributing to **50,000+ audience growth** across digital platforms.
- Created reusable design assets across social, digital, and print media, ensuring consistency and scalability.

SELECTED WORKS

CMS Dashboard Redesign & Workflow Optimization

- Redesigned a complex internal console used for content and screen management, improving navigation, reducing visual clutter, and simplifying feature discovery. Introduced structured layouts and logical grouping of features, reducing cognitive load and enabling faster task completion for users across technical and non-technical roles.

CMS Ecosystem Enhancements

- Designed features to improve media management and content organization, including cross-section media movement and streamlined workflows. Reduced operational friction and improved usability across day-to-day platform usage.

CMS Mobile App Revamp

- Redesigned the mobile experience to enable seamless content management on the go. Improved usability, simplified workflows, and enhanced engagement through modern interaction patterns.

Thinkstack Website Design

- Led end-to-end redesign of the company website, improving information hierarchy, navigation, and responsiveness. Enhanced user engagement and trust through cleaner layouts and consistent branding.

Design System Development

- Contributed to building a scalable design system with reusable components, typography standards, and color tokens. Reduced design inconsistencies and improved collaboration between design and development teams.

EDUCATION

BACHELOR OF ENGINEERING - COMPUTER SCIENCE

2018 – 2022

Aalim Muhammed Salegh College of Engineering
