TIZEN

AI Signage

Artificial Intelligence for Next-Generation Signage Solutions

Pickcel has developed these capabilities, offering them as bespoke solutions tailored to meet specific requirements.

AI Controlled Lift & Learn - Using AI powered image, the system can identify the specific item a customer has picked up and display information relevant to that item.

Gesture controlled Signage - Gesture recognition can also be used for a touchless interactive experience.

AI Signage Chatbot - Using voice recognition and natural language processing, signs can respond to verbal queries from users, providing information

Personalized Content Delivery - AI can analyze audience demographics such as age, gender, and even emotions using facial recognition and machine learning algorithms. This information enables digital signage to display tailored content that resonates with the viewers.

Enterprise-Grade

Robust Security for Enterprise-Level Digital Signage Demands
